Perfect Solutions for all water side problems under one roof

INTRODUCTION

We are pleased to introduce ourselves as service company to your esteemed organization, We deal in chemicals supplies, backup services & trouble shooting of the plant problems related to boilers cooling towers, heat exchangers, ion exchangers, heat transfer surfaces and steam distribution networks.

Our team of qualified exngineers is fully capable of handling any upset at your site, backed with over the years of experience of our technologically advanced system well established in Karachi.

Our main objective is to provide to our distinguished customers the most suitable treatment program for boilers, cooling towers, chillers, condensers, evaporators and boiling columns etc. Keeping the view the specific requirements of your facilities, we also coordinate with your plant personnel's to optimize the performance of your plant through detailed audits and surveys resulting in substantial reduction in operating cost.

We are the sole representative of "WT- Series" water treatment chemicals. This enable us to develop a tailor made water treatment package for our each valuable client. In addition to water treatment products, we also stock PVC butterfly valves & double union ball valves, PVC air release valves, multistage centrifugal pumps, ion exchange resins, chemical dosing pumps, water testing kits etc.
